Bescon Super Nebula Glow in the Dark Dice Set

DEEP SPACE & NORTHERN LIGHT

They are wonderful ideas from our great Hague.They are also successful Kickstarter project (funded in 14 hours! and 200% after 2 days)

For our DEEP SPACE polyhedral dice set, they are dark blue translucent dice with silver glitter and blue GLOW IN THE DARK nebulas, and with NORTHERN LIGHTS, they are light blue translucent dice with silver glitter and green GLOW IN THE DARK nebulas.

The color of these luminous dice is not as deep compared to full colored dice. This allows the special effect of our dice: When the lights are out, the blue (night) sky turns into nebulas glowing like the northern lights or deep space.
We achieved the glow in the dark effect with a nebula technique!
