Conventions

One of our major goals is to exhibit at as many conventions as possible. Even though our catalog is a good representation of our range, photos are never as good as seeing the actual products. We are also interested in seeing you, our customer, and hearing what you have to say concerning our products. Check our web site (www.chessex.com) to see when we will be at a convention near you!

Dice Holder™ Jewelry

Customers have asked us many times to make jewelry out of our dice. We thought the only way we could attach the die to the jewelry would ruin the die. Also, due to our wide spectrum of shapes and colors, we could not figure out a way to narrow the range to make the product viable in the marketplace. Lo and behold, Siltoys, a company in Italy, came up with a unique design concept that solves both of these problems. It's called Dice Holder™ jewelry. The basic concept is that the jewelry piece which holds the die is itself held together by small flexible O-rings. These O-rings are strong enough to hold the die firmly in place while also allowing the die to be swapped out. Not only does this save the die from ruin, it also allows the owner to significantly change the appearance of the jewelry whenever the mood suits them. Each jewelry piece is usually specific to one shape and the angle tolerances are so narrow that only our dice work for this jewelry. However, some pieces can be used for more than one shape and these are noted by their picture. Dice Holder™ Jewelry comes in the same 4-1/8 x 2 3/4 clamshell packaging as our Ten d10™ sets, but is twice as thick (1-3/8"). We have included a die of special color style with each Dice Holder™. This exclusive special color die is not available separately. The Dice Holder™ jewelry is available with a chain or key chain (not pictured) attached.

Quality and consistency are the ultimate goals in making "The Coolest Dice on the Planet™". At Chessex we are striving to bring uniformity of size, number marking and shape amongst our dice. Our goal is to give you the confidence of knowing that any Chessex die you purchase will always be of consistently high quality. In order to effectively meet this criteria, we have created

The Chessex Standard™

All of our dice are available in 4 types of sets:

d4

All of our dice read from the top, making them easy to comprehend.

d6

For ease in reading, we now use underscoring, rather than tiny indicator dots, to differentiate 6's from 9's.

d8

d10

All polyhedral dice have sharper edges for easier shape recognition.

Tens 10™

d12

All of our numbers are as large as possible on each face.

d20

16mm d6 w/pips

12mm d6 w/pips

Rounded corners on our piped dice enable the dice to tumble well on small surfaces, such as gameboards.

Ten d10™ set

Each Ten d10™ set contains only d10s and is available in each style and color of dice we offer.

Each Polyhedral 7-Die Set includes one each of: 4-sided (d4), 6-sided w/numbers (d6), 8-sided (d8), 10-sided (d10), Tens 10 (d10 numbered 00-90), 12-sided (d12) and 20-sided (d20). These sets are available in each style and color of dice we offer.

Polyhedral 7-die set

16mm d6 w/pips Dice Block™

Each 16mm d6 w/pips Dice Block™ contains 12 of these d6s and are available in each style and color of dice we offer.

Each 12mm d6 w/ pips Dice Block™ contains 36 of these d6s and are available in each style and color of dice we offer.

12mm d6 w/pips Dice Block™

WARNING!

Choking Hazard
Dice are not intended for children under the age of 3 years.

Opaque Dice are made of a particularly dense material for a better feel when rolling. This material also allows for flatter faces and sharper edges. The wide variety of colors is also very consistent so that an opaque Chessex die from years ago will match those available today. These dice are very economical, at a fraction of the cost of other materials. The Opaque Dice Color Reference Pack is combined with the Translucent dice and is listed on page 8.

2008-2009 Opaque and Translucent Dice Color Reference Pack CHX 29961

This reference packet is a must for inventory and ordering purposes. This packet consists of one 16mm d6 with pips of each of all 15 colors of the Opaque and 9 colors of Translucent dice, each labeled with their name. On the backside is a chart with the color names and stock numbers of each available type of set (Ten d10™ set, Polyhedral 7-die set, 12mm d6 Dice Block™, and 16mm d6 Dice Block™).

Speckled Dice have been a popular color range for the past two decades. Speckled dice are made with the same material as the opaque dice resulting in a good shape and feel during use.

2009 Signature™ Dice Color Reference Packet ... CHX 29994

This reference packet includes one 16mm d6 w/pips of each of all the 26 colors of our Signature™ dice, each one labeled with their name. On the backside is a chart with the color names and stock numbers of each type of set that is available.

Keeping-In-Stock (KIS) Dice

As we bring out new colors, some sell exceedingly well and others don't sell as well. The most popular colors become incorporated into the Signature™ range. The colors that sell poorly get discontinued. Once these colors are determined there are still many colors that sell well enough to keep in stock and those are featured here.

Cheat Dice

Cheat Dice are a must for those looking to increase their odds. Each set has seven dice: two d20's, two d10's and three d6's. One d20 is numbered normally but the other has two 20's and no 1's. One d10 is numbered normally and the other has two 0's and no 1's. One of the d6 is numbered normally, another has two 1's with no 6's, and the last

one has two 6's with no 1's. Use the normal die for most rolls and swap out the cheat dice to increase your odds for those really important rolls!

Custom Engraved

Dice have long fascinated people. It's no secret. With the advent of plastic dice molding, people have clamored for something more than dice with standard numbering: symbols, runes, icons...you name it, there's probably someone who wants it.

The problem in the past for these "custom" dice has always been the price of the molding. Small production runs do not even come close to recapturing the up-front costs. The alternative to molding custom dice is printing and silk-screening, methods that produce good images but which wear away over time. Also, the set-up fees for artwork can financially kill small projects from the start. These factors have long limited the manufacture of custom dice.

What has been desperately needed is a manufacturing solution that encompasses the following parameters: short production times, low set-up costs, high detail, and permanent images. We have perfected an elegant engraving method to fulfill these requirements, and when used in combination with our wide range of great dice colors, satisfaction is a sure thing.

Some Uses for Our Custom Engraved Dice:

- Promotional and business card dice.
- Replace specialty dice with better artwork.
- Replacement of lost dice.
- Keepsake/Memento dice for events such as conventions, weddings, graduations, and birthdays.
- Prototype dice for game designs.

Features of Our Engraving Process:

- Our dice are engraved and not printed, resulting in durable designs that will not rub away.
- No set-up fee for artwork.
- A sample die can be quickly generated and a photo sent electronically for approval.
- Low minimum, order as few as 10 dice.
- Multiple dice color per engraving possible.
- High amount of detail.
- Quick turn-around time on all orders, usually less than one week.
- Wide range of our unique colors.
- Engraving available on polyhedral dice other than 6-sided dice.
- We can engrave on items other than dice (contact us for details).

Current Capacity:

- We engrave both text and graphics (line art is preferable).
- We currently have 6-sided dice with a blank '1' side in 16mm, 19mm, and 30mm available in many colors.
- We currently have 6-sided dice with a blank '6' side in 16mm available in a number of colors.
- 10-sided dice with a blank '0' side.
- Polyhedral dice (4-sided, 6-sided, 8-sided, 10-sided, 12-sided, and 20-sided) blank on all sides available for total custom engraving.

Future Expanded Capacities:

We are continuously working to widen our scope of capabilities in order to produce custom engraved dice in greater varieties and quantities. This includes more dice shapes and sizes we can engrave upon and greater range of dice colors.

For pricing, please contact us or go to www.chessex.com and look under custom dice. To ask for sample die to be made or other inquiries, e-mail us at custom@chessex.com.
